

Car Wash SPOTLIGHT

Golden Pro Equipment

April, 2007

In the Spotlight this month is George Vendegnia, located in Golden Colorado. This remodel location had one Southern Pride Turbo Automatic and five self service bays. The 20 year old automatic was replaced with a new Pro Navigator Automatic using the existing pumping station, which saved the owner money on equipment. A new touch screen control center was added to the old pump rack for ease of programming.

The Pro Navigator gives a superior wash job and now affords the owner the ability to wash extended cab, long bed trucks.

The self serve bays were outfitted with Hi-Performance Wash's Hi-Per Foam low pressure system and the CardMate™ Carwash Activation System by WashGear.

The site accepts credit cards at the Hamilton Gold Line® Autocashier and self service bays through a single processing system. Fleet card and gift cards may also be sold to interested wash users as an added source of income. For more information please contact the sales department at any of the numbers listed below.
