

Car Wash SPOTLIGHT

STREAM LINE AUTO SPA

HPWS is pleased to announce the opening of *Stream Line Auto Spa* located at 15201 E Smoky Hill Road in Aurora, CO. The site which formerly operated as a full service wash, has been converted by **HPWS** to a flex serve operation, with express and full service detailing available.

Many needed improvements were made to the building, paved lot and landscape. The site was transformed from an eyesore into a very pleasant and welcoming environment. All of the old inoperable car wash equipment was replaced by a completely new line of *Hanna Tunnel* equipment. The 43 foot long tunnel was “creatively repacked” with all the necessary components for turning out clean cars. The new equipment includes a new conveyor system, mitter curtains, rocker panel washers and a set of flex wraps. *Hanna Versa Arches* are utilized to apply soap, rinsing and surface protectants, including a *Rain-X* arch. A brand new 30 hp dryer completes the tunnel line. New *Vacutech* vacuums were also installed to provide clean interiors. The number of vacuum stations was doubled and relocated to consolidate the full service offering and to provide for faster throughput and improved site flow.

Stream Line will offer four wash packages which include two express and two full service options. Customers can also choose from limited ala cart upgrades when purchasing full service packages. The owners are committed to an eco friendly operating approach and have decided to utilize only soaps, waxes and wash solutions that are environmentally friendly. They have chosen the *Ecolab* line and their wash has been certified in the *Ecolab “Beyond Green”* program.
